Kindworth – KQ Metric Formula & Rationale (Updated)

1. Introduction

The Kindness Quotient (KQ) is a fixed 100-point score designed to quantify emotional intelligence and leadership potential based on behavior. It transforms small acts of kindness into measurable indicators of cultural influence, consistency, and team impact.

2. The Formula

KQ is composed of the following components:

- Contextual Kindness – 30 points

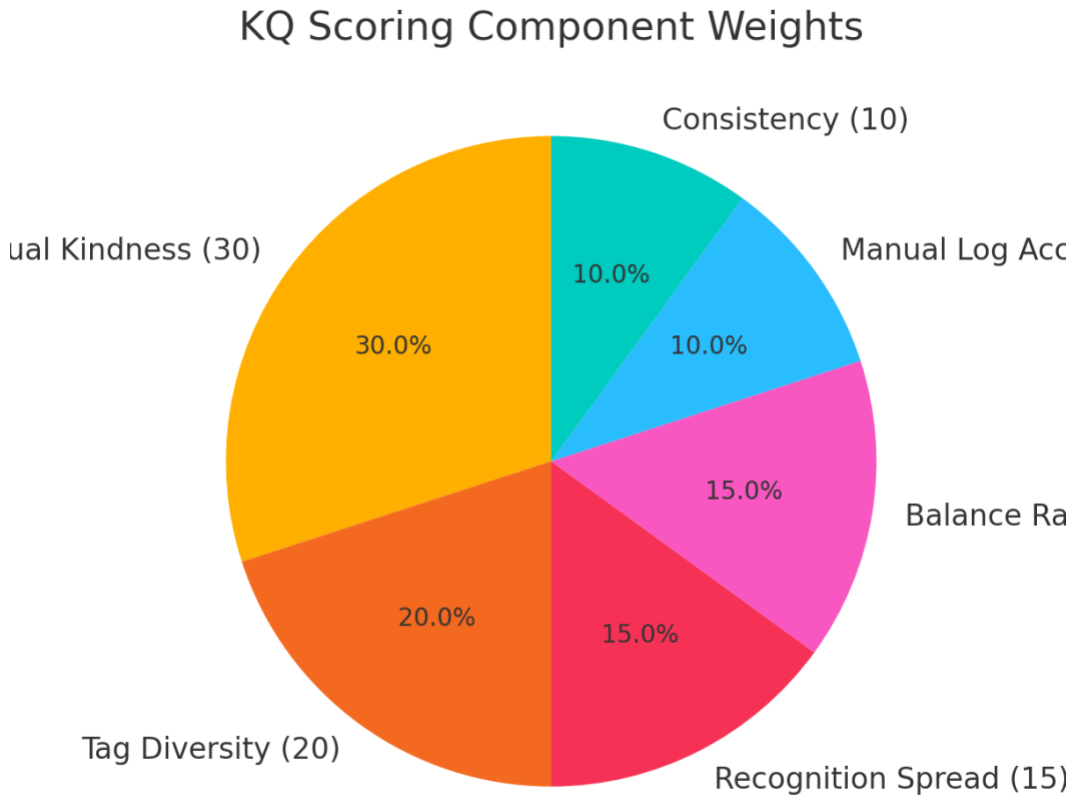
- Tag Diversity – 20 points

- Recognition Spread – 15 points

- Balance Ratio – 15 points

- Manual Log Accuracy – 10 points

- Consistency – 10 points



3. Behavior Tag Mapping

Each behavior tag contributes to specific components of the KQ formula. For example:

Tag	Description	Impacts Component(s)
Silent Support	Initiative without expecting recognition	Contextual Kindness, Tag Diversity
Proactive Help	Preemptively solved a problem	Contextual Kindness, Recognition Spread
Peer Coaching	Guided or trained a peer	Tag Diversity, Recognition Spread
Gratitude	Meaningful thanks	Tag Diversity, Balance Ratio
Public Recognition	Acknowledgement in public	Balance Ratio
X-Team Help	Cross-team support	Recognition Spread

4. Scoring Logic Examples

Example: A teammate helps during a deadline crunch without being asked.
→ Tag: Silent Support
→ Score: 8 pts to Contextual Kindness, 2 pts to Tag Diversity

Example: Public recognition for guiding a peer on a new tool.
→ Tags: Peer Coaching, Public Recognition
→ Score: 6 pts to Tag Diversity, 4 pts to Balance Ratio

5. Recognition Log Mechanics

Each recognition — whether automatic (via NLP) or manually logged — contributes a score typically ranging from 6 to 10 based on the context, sender novelty, and behavior pattern. These logs are then routed into the KQ component framework described above.

Over time, KQ is built by aggregating hundreds of such logs into a 100-point fixed scoring system. This ensures fairness, consistency, and leadership signal strength.

6. Governance & Accuracy

- Manual recognitions must be approved by the recipient
- Logs unapproved in 7 days are escalated to managers
- Managers receive daily digest for oversight
- No decay logic; all recognized acts contribute to long-term profile
