People Intelligence Platform

Predict burnout. Identify leaders. Optimize culture.

VERSION 2.0 • SEED ROUND

The Problem

HR teams are flying blind on workforce health

Burnout Blindspot

77% of employees have experienced burnout. Most companies only find out after it's too late—through resignations or performance collapse.

$125B

Annual cost of workplace stress in the US

Flight Risk Mystery

Average voluntary turnover costs 50-200% of salary. Current tools detect attrition after notice is given, not before.

33%

Employee turnover is preventable with early intervention

Promotion Guesswork

Leadership potential is assessed through biased reviews and gut feelings, not objective data.

60%

Of new managers fail within 24 months

Sources: Gallup, SHRM, Harvard Business Review

Our Solution

Turn existing Slack data into workforce intelligence

- **Burnout Detection** — Identify at-risk employees from workload patterns and after-hours activity
- **Flight Risk Prediction** — Detect engagement decline before resignations happen
- **Leadership Pipeline** — Data-driven promotion readiness scoring
- **Team Health Monitoring** — Per-department analytics with actionable insights
- **Culture Index** — Track organizational health over time

🔒 **Privacy-First**

We process conversations but never store them. Only anonymized metrics are retained.

10min

Setup time with Slack integration

0

New employee surveys required

V2 Intelligence Metrics

Novel KPIs derived from recognition data

Extra Work Index

Quantify hours spent helping others beyond core role—measures invisible workload

Burnout Score

Multi-factor risk score (0-100) combining EWI, overtime, and overload patterns

Flight Risk

Engagement decline detection—compare recent vs. historical activity

Leadership Score

Promotion readiness based on cross-team influence and delegation balance

Bridge Score

Cross-department connector identification—find silo-breakers

Giver/Taker Ratio

Recognition economics—identify contribution imbalances

Reciprocity Score

Mutual recognition relationships vs. one-way patterns

Team Health Index

Department-level health combining cohesion, equity, burnout

Patent-pending methodology

Simulated Validation Results

Analytics from 350-employee company simulation (12 months)

572K	16.5K	30%	47
Messages Analyzed	Recognition Events	Cross-Team Collaboration	High Burnout Risk

🎯 Insights Generated

- ✓ Identified 47 employees at high burnout risk
- ✓ Flagged 23 with declining engagement (flight risk)
- ✓ Surfaced 31 promotion-ready leaders
- ✓ Found 18 hidden influencers without formal authority
- ✓ Detected 2 teams with health status "at risk"

💰 Projected ROI

$705K
Avoided turnover costs (47 × $15K)

60%
Faster promotion decisions

2.3x
More engaged culture

90%
Less time in annual reviews

Based on simulated company data

Market Opportunity

People Analytics is the fastest-growing HR tech segment

$4.2B

TAM by 2028

Growing at **13.4% CAGR**

🏢 Target Customers

- Mid-market companies (100-5000 employees)
- Already using Slack for communication
- HR teams frustrated with survey fatigue
- Tech-forward culture, data-driven decisions

💼 Why Now?

- Post-pandemic burnout epidemic
- Remote work = more digital exhaust
- Great Resignation heightened retention focus
- AI/ML makes passive analytics viable
