Kindworth Pricing & Operations

Investor Overview Document
October 2025

1. Overview

Kindworth's pricing and operational strategy is designed to scale efficiently while ensuring accessibility for organizations of all sizes. The platform follows a recurring revenue model (SaaS) with optional enterprise enhancements and API integrations.

2. Pricing Model (USD)

Kindworth operates on a tiered SaaS subscription model:

• Starter – $499/month: Up to 100 active users, core KQ™ tracking, monthly analytics report.

• Growth – $1,499/month: Up to 500 users, advanced dashboards, custom tags, and sentiment insights.

• Enterprise – $4,999+/month: Unlimited users, API access, dedicated CSM, full data integrations, and compliance setup.

• Add-Ons: Behavioral benchmarking, ROI dashboards, and white-label deployment available at custom rates.

3. Example Pricing Logic

Each pricing tier scales based on active users and data volume. The average customer lifetime value (LTV) is projected at $18,000 with an average contract length of 12 months. Annual prepayment discounts (10–15%) are offered to encourage long-term retention. Pilot programs are available for enterprise clients before full rollout.

4. Revenue Strategy

• Freemium entry for small teams transitioning into paid Growth plan within 60–90 days.

• Annual Recurring Revenue (ARR) target: $2.5M in Year 1, $7M in Year 2, $15M in Year 3.

• Customer expansion model: 25% of enterprise clients expected to add API or benchmarking modules post-onboarding.

• Partner incentives for HR-tech consultants and system integrators (10% recurring referral margin).

5. Operational Structure

Operations are designed to remain lean through automation while maintaining a high-touch client experience. Cross-functional teams handle data accuracy, customer success, and AI reliability under a unified framework.

• Core Teams: Product, Engineering, Data Science, Customer Success, and Operations.

• Automation: HubSpot CRM, Slack alerts, Metabase dashboards, and AI monitoring bots.

• Customer Success Ratio: 1 CSM per 5 enterprise accounts for proactive engagement.

6. Support & Success Framework

• 24/7 support via in-app chat and email (Zendesk integration).

• Dedicated onboarding sessions for enterprise clients.

• Quarterly business reviews with performance reports and KQ trend summaries.

• Knowledge base and training library for self-service learning.

7. Scalability & Future Roadmap

Kindworth's infrastructure and operational model are built to handle 10× user growth with minimal incremental cost. AI automation will reduce manual oversight while improving insight accuracy. Regional operations will expand alongside partner ecosystems.

• Q1 2026: Launch self-serve onboarding portal and AI-powered health scores.

• Q3 2026: Expand to EMEA and APAC with localized support teams.

• 2027–2028: Introduce predictive retention models and automated HR recommendations.

8. Next Steps & Contact

• Finalize pricing partnerships with HR consultancies and resellers.

• Implement automated billing through Stripe and QuickBooks integration.

• Scale pilot-to-enterprise conversion pipeline across Canada and the U.S.
